

NIST 800-53 assessment

As security threats become more sophisticated and pervasive, the complexity of effectively evaluating your organization's risk also is increasing.

One effective method of improving information security is to adopt the National Institute of Standards and Technology's security and privacy controls for federal information systems as outlined in NIST Special Publication 800-53. This government standards-based assessment of security governance and technologies provides a solid foundation to measure the confidentiality, integrity and availability of enterprise data processing environments.

The Flexential professional services team of cybersecurity experts can custom-design a NIST 800-53 assessment based on your organization's size, complexity, industry, compliance requirements and, most important, actual needs. We'll dig deep to uncover inadequate security and privacy controls, potential threats and applicable requirements to mitigate your risk exposure.

Our team provides proactive plans for quick remediation, with recommended actions, timelines and resources to help you bolster your information security stance.

Flexential has helped all types of organizations – from large corporations to healthcare organizations – improve data security and privacy aligned with NIST 800-53 standards.

Features

- Consultation with an experienced NIST 800-53 assessor who conducts a comprehensive current-state review
- Vendor-agnostic approach and expertise in multi-platform management and compliance remediation
- Tight integration with Flexential data center support team
- Report detailing appropriate changes to meet NIST 800-53 standards
- Letter stating your processes and controls are compliant with NIST 800-53

Benefits

- Measure the confidentiality, integrity and availability of information assets based on U.S. government standards
- Make informed decisions to bolster your information security stance
- Mitigate information security and privacy risk exposure
- Demonstrate your commitment to NIST 800-53 compliance

Real-world, multi-platform experience

Interpreting NIST 800-53 standards can be a complex endeavor. Flexential has a deep bench of compliance professionals with real-world expertise in protecting the security and privacy of customer information assets to meet U.S. government regulatory standards outlined in NIST 800-53.

Proof of compliance

Flexential NIST 800-53 assessments include a letter of attestation that you can provide to applicable agencies, boards of directors and other stakeholders as proof your organization meets NIST 800-53 security and privacy controls.

Ongoing support

Rely on Flexential for guidance in ensuring your infrastructure and data maintain the highest levels of protection available. As your partner, we provide ongoing support through compliance assessments, periodic audits and mitigation to help your organization manage risk effectively.

Flexential helps organizations optimize IT transformation while simultaneously balancing cost, scalability, compliance and security. With a focus on building trusted relationships, providing valuable support and delivering tailored solutions and reliable performance, Flexential delivers colocation, connectivity, cloud, managed solutions and professional services to 4,200 customers across the U.S. and Canada.
