# FLEXENTIAL

Wholesale data center solutions

It isn't simple to find available space in the geography you need that can meet your power and cooling requirements while also delivering the cyber and physical security you need. But there is even more to a succesful data center deployment than the building itself. Just as important is how will you connect from the data center to your end users.

Flexential has the move-in ready inventory that can be tailored to meet your power, cooling and security needs. We have the ability to support deployments of 250kW or more backed by redundant, UPS-backed power and cooling infrastructure. And our facilities are connected via our FlexAnywhere network fabric. With an industry leading 100Gbps network backbone that is scalable to 400Gbps, customers equipment is one hop away from any of our infrastructure resources ensuring high performance, low latency and maximum reliability.

Why Flexential?

Connectivity

Access to 470+ carriers via carrier hotels in Ashburn, Chicago, Newark, Seattle, Atlanta and Portland

Fast, direct connections to Asia and South Pacific through subsea cable terminations in our Portland/Hillsboro 2 data center

Industry-leading 100Gbps backbone network, scalable to 400Gbps

Metro fiber ring access in Atlanta, Portland and Denver

Flexential fabric supports a SDDC ecosystem

80+ domestic and international on-net carriers

100% network and bandwidth uptime commitment

Flexential footprint

Nationwide footprint of 41 data centers; 3.1M sq. ft. of operational space

Move-in ready space available supporting loads of 250+ kW

Located in 21 diverse domestic and international markets

Edge data center services to reduce latency and deliver content closer to end users

Tax abatement and incentive programs

Market competitive rates
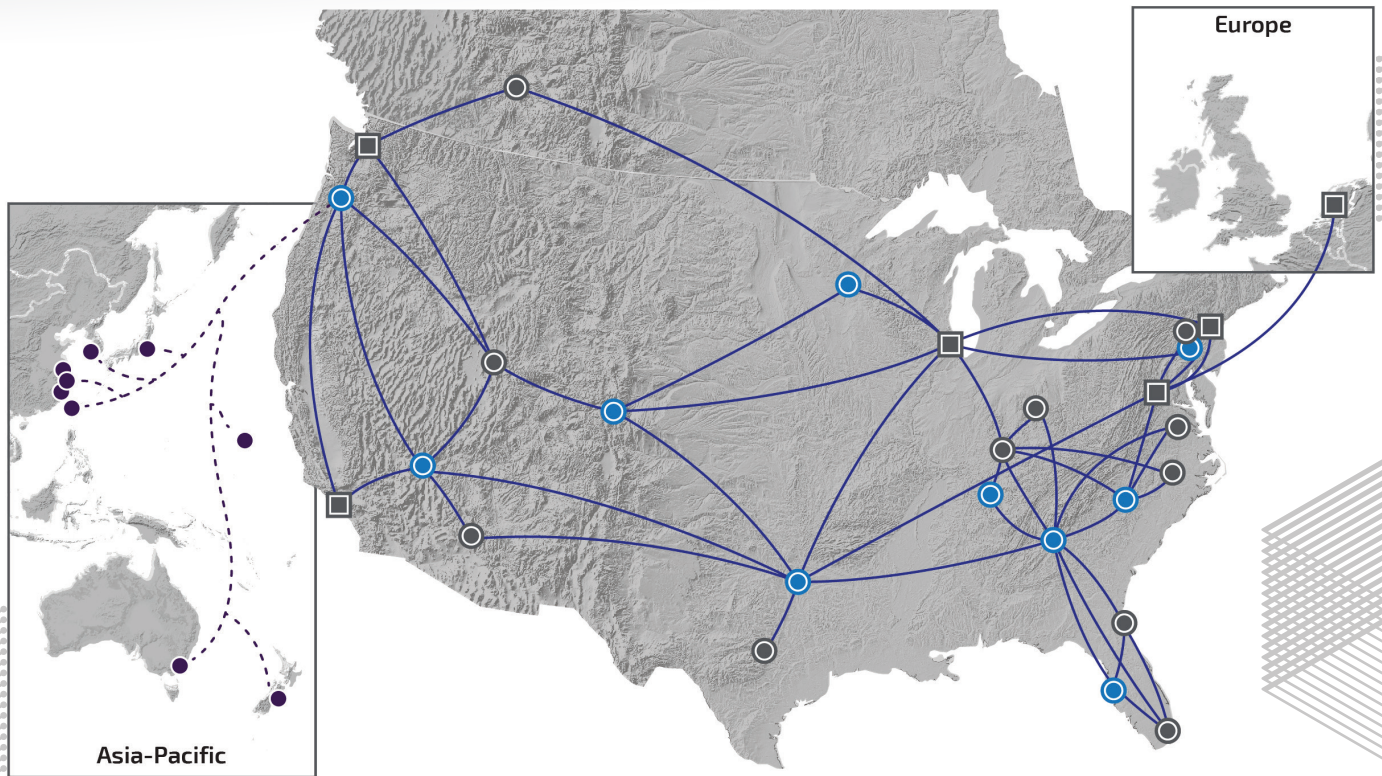

Footprint located in low-risk natural disaster areas

Support

Data centers staffed 24/7 with certified engineers, remote hands support and security personnel

Dedicated IP and backbone engineers who provide 24/7 connectivity monitoring

Migration support

Flexential footprint is supported by DCIM system

Managed and Professional Services

24/7 on-site security

Facility DR and Office Space

Colocation | Connectivity | Cloud | Managed solutions | Professional services | **The power of people in a technical world**
