Managed DevOps

Software development frequently entails intellectually demanding problem solving. Dealing with buggy or broken code, resource constraints, repetitive tasks and unyielding deadlines make for a stressful day. When unplanned security patches and inevitable IT crises arise, a developer's job becomes further fragmented.

The professional services team at Flexential understands DevOps and excels at managing complex environments. We work collaboratively with your team, providing production guidance and support across multiple environments to help you hone best practices and optimize efficiencies. We can help you begin the organizational shift required when adopting DevOps methodologies.

We're big proponents of repeatable processes, clear documentation and open communication to keep your staff fully abreast of operational changes. Our goal is knowledge transfer. While we're here whenever you need us, we'll empower your staff with the training and information needed to handle future problems. Ultimately, your developers will spend fewer hours slaying dragons and more time focused on strategic initiatives that accelerate business growth.

Benefits

- Gain control over growing IT complexity
- Optimize developer efficiencies
- Improve operational change management practices
- Focus on strategic software development initiatives that accelerate growth
- Speed time to market

FLEXENTIAL

Eliminate environment drift and production deployment downtime

If your developers devote excessive energy each day managing, troubleshooting, reconciling and optimizing multiple IT environments, chances are they're falling short of delivering true business value. Flexential platform management is ideal for businesses in hyper growth mode that need to optimize environments and free up time to devote to more sophisticated software development.

Drive innovation initiatives

As businesses contend with digital disruption, IT departments must evolve from a support function to a leadership role to positively impact organizational advancement goals. The Flexential professional services team can give your development staff the right boost to accelerate programs that spur business growth.

Divide and conquer

Battling with platform management demons shouldn't be your biggest impediment to delivering on your strategic growth objectives. When your developers run into complex issues common with running a growing IT environment, Flexential can provide resources that act as a collaborative extension of your team to help alleviate pressure points and increase efficiencies.

Flexential helps organizations optimize IT transformation while simultaneously balancing cost, scalability, compliance and security. With a focus on building trusted relationships, providing valuable support and delivering tailored solutions and reliable performance, Flexential delivers colocation, connectivity, cloud, managed solutions and professional services to 4,200 customers across the U.S. and Canada.
