

Desktop-as-a-Service (DaaS)

Flexential's DaaS solution is powering today's remote workforce.

Flexential Founded
1999

Gartner recently found that 74% of CFOs intend to shift some positions to working from home permanently because of increased efficiencies.¹

Recent worldwide events have forced enterprises to shift away from the traditional corporate office model to support a primarily remote workforce. In fact, as a result of the COVID-19 pandemic, the labor force increased from 10% to an estimated 70% in remote workers. This has meant IT staffs have had to quickly re-architect their IT infrastructure to empower remote workers by provisioning hardware and SaaS applications, while ensuring security, accessibility, and procurement of tools & equipment.

Flexential's Desktop-as-a-Service (DaaS) enables workers to access workspaces and applications from any device, at any time, from anywhere. Flexential's DaaS is a turn-key solution which allows enterprises to instantly access virtual desktops that provide enterprise-class connectivity, security and performance to deliver the equivalent of an in-office desktop experience to workers connecting remotely to enterprise LANs.

The benefits of Flexential's DaaS solution also include centralized management making it easy to provision new virtual desktops, add new apps and perform upgrades and patching which scales to thousands of virtual desktops. Flexential's DaaS solution also provides secure access to company data without storing anything on local devices and access control using authentication.

Flexential DaaS – Powered by Nutanix Hyperconverged Infrastructure (HCI)

Flexential's DaaS solution is inclusive of infrastructure and desktop management, with tailored options to meet specific business requirements. The infrastructure is built on Nutanix's HCI solution which accelerates DaaS deployments by up to 8x, linearly scaling from pilot to production, with lower risk and as much as 50% lower TCO than traditional IT approaches.

Flexential DaaS Use Cases Include: _____

- Replacing individual physical desktops and laptops including high performance workstations with secure, responsive virtual desktops
- Delivering virtual applications in the same manner as Software-as-a-Service (SaaS)
- Delivering secure desktops and apps for temporary workers or contractors for a fixed time period
- Delivering secure desktops for specific industries like healthcare, public sector, fintech, and more

Flexential Utilizes Versiant for Ongoing DaaS Management and Customer Support _____

As part of the overall DaaS solution, Flexential assumes responsibility for the entire VDI solution and will be responsible for managing the VDI core infrastructure utilizing Nutanix HCI. To this end, Flexential has partnered with Versiant to provide on-going VDI support. Versiant leverages 10+ years of DaaS experience and provides organizations with a high-touch, customized support model to ensure a world-class customer experience. The offering includes provisioning, maintaining, and securing/patching of the management components and resource workloads.

Benefits _____

- **Remote worker productivity** - Enables end-users to access work environments and data utilizing their own devices anywhere
- **Scalability** – A complete DaaS solution that gives organizations the ability to quickly and efficiently add users so they are immediately productive
- **Consistent performance** – Flexential's turnkey DaaS solution provides consistent low latency performance to deliver the equivalent of an in-office desktop experience to workers connecting remotely to enterprise LANs, regardless of the number virtual desktops being consumed
- **Security and compliance** – Flexential's DaaS solution comes pre-integrated with built-in security and compliance up to the hypervisor and is built into the mobile device management suites that integrate with cloud applications, providing a more wholistic compliance architecture
- **Centralized management** – Makes it easy to provision new virtual desktops, add new apps and perform upgrades and patching which scales to thousands of virtual desktops
- **Complete solution** – Flexential provides a complete end-to-end DaaS solution inclusive of infrastructure and desktop management, with tailored options to meet their specific business requirements

ABOUT FLEXENTIAL

Flexential empowers the IT journey of the nation's most complex businesses by offering flexible and tailored solutions in colocation, cloud, data protection, managed and professional services. The company builds on a platform of three million square feet of data center space, in 20 highly connected markets and the FlexAnywhere™ 100 GB private backbone, to meet the most stringent challenges in security, compliance and resiliency.
