Disaster Recovery-as-a-Service **(DRaaS)**

In today's always-on, information-driven organizations, IT resilience depends on IT infrastructures that are available 24/7. The costs of downtime are huge and data loss can put a company out of business. Data loss is not only caused by natural disasters, power outages, hardware failure and user errors, but more and more often by software problems and cybersecurity-related disasters.

Therefore, extensive security and business continuity strategies including a Disaster Recovery-as-a-Service (DRaaS) solution, are crucial for modern business survival.

Flexential DRaaS is a robust, flexible and cost-effective cloud-based disaster recovery solution that offers end-to-end protection for your systems and applications, and guarantees continuity for your business—no matter the disruption.

Features

- Flexible, add-on options outfit any IT or business requirement
- Support for colocation, cloud, customer-prem and hybrid environments
- Support for hybrid environment through on-ramps to hyperscalers
- HA infrastructure ensures availability in the event of a disaster
- Near real-time replication results in the lowest RTO and RPO times in the industry
- Self-service and live U.S.-based support available 24/7/365
- Five strategically-located DR centers provide coverage within 600 miles of most U.S. metropolitan areas
- Recovery journals provide up to 30 days of point-in-time recovery
- Unlimited testing
- Flexential Professional Services to support DR readiness and complete end-to-end DR design
- Previously-owned Zerto subscriptions may be leveraged through the BYOL program
- One-to-many option allows environment replication to additional Flexential recovery sites or a customer target site
- Support of active - active configurations

Flexential Founded
1999

"DRaaS is a great option for I&O (Infrastructure and Operations) leaders who want to improve IT resilience, meet compliance and regulatory requirements cost efficiently, and address resources deficiency."

– **Gartner**, Market Guide for Disaster Recovery as a Service 2020

Flexible, Robust and Secure Cloud-Based Disaster Recovery

Flexential DRaaS is powered by Zerto, IT Resilience Platform™ based on Continuous Data Protection (CDP), an engine that provides the lowest RTOs and RPOs in the industry. Flexential DRaaS combines the robust capabilities of Zerto's replication software with an extensive portfolio of secure, compliant cloud-based disaster recovery services. Flexential DRaaS packaging options, including a base and optional add-ons, can be selected to meet your individual requirements, providing extensive flexibility and cost efficiency as you pay only for what you need.

Flexential DRaaS Base	· Multi-tenant DRaaS · Flash accelerated storage · Two-day journaling · Self-service DR declaration · Full portal access to real-time stats	· Self-service testing · 10 minute RTO with self-service DR declaration · Eight hour RTO-guided DR declaration · Per VM licensing
Add-on Packages	· Managed physical/virtual customer provided firewall · Dedicated compute · 5 day, 14 day, 30 day journal options · Dedicated SAN support	· Flexential Professional Services DR services · Multi-cloud (O2M) package · Hyper-V support · 14 day, 30 day DR runtime package · Unlimited testing package

With Flexential DRaaS you not only receive a flexible, cost-efficient solution capable of supporting your security and compliance requirements, but you also benefit from a team of Flexential disaster recovery experts that guide you throughout the entire DR lifecycle.

Benefits

- **Flexibility** – customizable add-on options answer any IT or business requirement
- **Predictability** – predictable cost through pre-defined DR and testing package options
- **Security and compliance** – supports multiple regulatory frameworks
- **Scalability** – scale on demand
- **Easy-to-use** – push button DR declaration through self-service portal
- **Cost Efficiency** – simple as-a-service payment model with no up-front costs

Flexential DRaaS Use Cases

- **Outages & Disruptions**
- **Ransomware Attacks**
- **Complete Data Protection**
- **Testing and DevOps**
- **Cloud Integration and Migration**

ABOUT FLEXENTIAL

Flexential empowers the IT journey of the nation's most complex businesses by offering flexible and tailored hybrid IT solutions comprised of colocation, cloud, connectivity, data protection, managed, and professional services. The company builds on a platform of three million square feet of data center space in 20 highly connected markets, and on the FlexAnywhereTM 100GB private backbone to meet the most stringent challenges in security, compliance, and resiliency. See how Flexential goes beyond the four walls of the data center to empower IT through an interactive map found on www.flexential.com.
