

# Flexential Managed Database

Unlock the full potential of your database environment

If you're looking for a solution that takes care of all your Relational Database Management System needs, allowing you to focus on your core business objectives, look no further than Flexential Managed Database service. With our comprehensive service, you can achieve peace of mind knowing that your database environment is in expert hands. Our service is tailored to your needs, whether you require a single, stand-alone database server or a complex, high-availability cluster.

The Flexential Managed Database service is available to support the following database platforms:

Microsoft SQL Server	MySQL	Oracle	PostgreSQL
----------------------	-------	--------	------------

Flexential handles everything for your database servers, from installation and migration to management and administration. We also provide support for advanced features like high availability, clustering, and replication. Following industry standards and vendor best practices, we optimize the performance of your database servers. We work closely with you to design and implement the ideal solution for your needs.

## Benefits

With the Flexential Managed DBA service, you receive the following benefits:

- **A dedicated Primary DBA** will oversee your account and provide personalized support
- **24x7 support** with an escalation path to Tier 3 database engineers
- **Expert installation and configuration** of your database engine, following industry, vendor, and Flexential best practices. Customized maintenance plans and jobs for crucial tasks like database backups, statistics, integrity checks, index maintenance, and clean-up tasks
- **Continuous monitoring, alerting, and log analysis** for your database performance and health
- **Advanced replication configuration options** such as log shipping, mirroring, Always On Availability Groups (AOAG), RAC clustering, FCI clustering, primary to secondary replication, and multi-subnet clustering
- **Ongoing assistance** with performance diagnostics and optimization
- **Quarterly reviews of database backup jobs** and test recoveries
- **Quarterly reviews of the database environment** and recommendations from your Primary DBA
- Consultation and future planning evaluation for your database engine lifecycle
- **Service pack and patch deployment** as approved by you

**Take control of your database environment and eliminate the hassle.**

Entrust your SQL Server needs to the experts at Flexential Managed Database service. With our unparalleled skills and cutting-edge tools, we can optimize your database's performance and ensure its health.
