

Discover the mile-high advantage

Elevate your IT infrastructure with Denver's strategic advantages and Flexential expertise

Denver is not just a mile high—it's miles ahead. As one of the fastest-growing technology ecosystems in the U.S., Denver is rapidly becoming the go-to destination for data center operations. With a 366.7% increase in power pipeline capacity in just one year, the question isn't why Denver—it's why not?

Denver's strategic advantages

Denver is a rapidly growing technology and innovation hub in a central US location with minimal risk of natural disasters. The city is a major hub for US fiber networks, serving as a key relay point between the West Coast, Midwest, and East Coast markets.

The Mile-High City ranks among the top 10 most active U.S. data center leasing markets and is one of the fastest-growing technology ecosystems in the country. Although it is not considered a Tier 1 data center market, its central location and cooler climate have made it a popular choice as enterprises embrace the affordability, flexibility, and availability of choosing a Tier 2 market. Denver is a growing data center ecosystem, experiencing a substantial increase in activity in recent years with enterprise-owned facilities by Lockheed Martin, Time Warner, Nissan, and Honda.

"In the print publishing world, missing a publication can destroy a business. Flexential's reliable data center and connectivity platform ensure we can publish every single newspaper across the country."

—Bob Kinney, VP of IT, [MediaNews Group](#)

Customer Success: MediaNews Group

When [MediaNews](#)' long-time data center provider was unable to offer an appropriate pricing strategy, the publishing company turned to Flexential. In addition to a cost-effective colocation solution, Flexential has helped MediaNews establish a hybrid IT strategy that can flex with the rapidly changing publishing industry and its growth-by-acquisition strategy.

 MediaNews Group

- **Natural disaster resilience:** Denver has a low risk of natural disasters like hurricanes and earthquakes.
- **High reliability:** Flexential Denver data centers feature fully redundant connections and 24/7 security.
- **Customer success:** MediaNews leverages the combination of Flexential Denver-area colocation with fully managed, blended connectivity, offering unrelenting uptime and the right access to scale operations and enhance service delivery.

Connect to a superior national platform

At Flexential, we understand that choosing the right data center location is about more than just geography—it's about finding the right partner who can support your growth.

Reliable, low-latency networks and interconnections are increasingly critical to Denver to support multi-cloud deployments, distributed and edge workloads, and a growing reliance on digital engagements. Flexential interconnected Denver-area data centers offer a combined 510,000+ sq. ft. and up to 80 + kW per cabinet to support high-density needs and intense processing requirements cost-effectively.

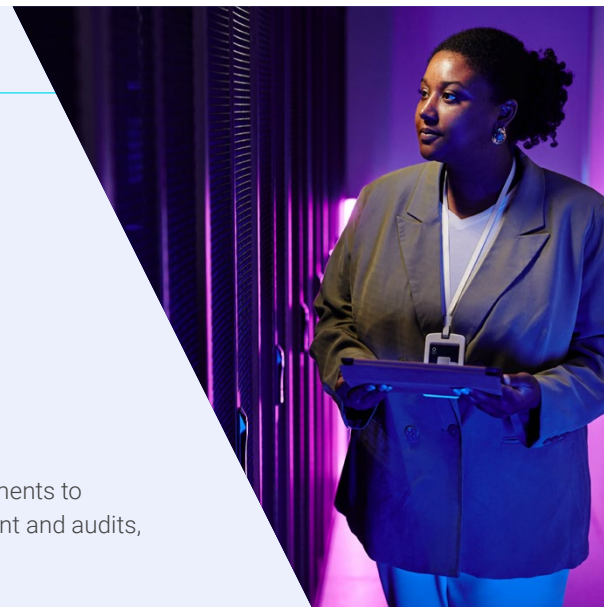

Our highly connected platform integrates our private 100 Gbps network backbone and diverse connectivity options to create a connectivity hub. Connect reliably and securely to data centers, the Internet, leading cloud service providers, and a rich ecosystem of carriers, all while optimizing end-user performance and reducing single points of failure on the network. Additionally, our unified fabric offers on-demand provisioning of connectivity services through a single port.

Tailored colocation solutions in Denver

Our Denver data center facilities serve as headquarters and a flagship location for Flexential and are among the most secure colocation and hosting spaces available, both technologically and environmentally.

- Improved reliability on **public cloud connections**
- Connections to a superior network of **40+ data centers across the U.S.**
- A **strategic partner** for improving response times
- Security and technical **staff on-site 24/7**
- Redundant, automatically rerouted connections ranging from **10 Mbps to 40 Gbps**
- **100 Gbps network backbone**, scalable to 400 Gbps

Plus, **Flexential Professional Services** will partner with organizations' internal IT departments to solve complex challenges including migration, security and risk management, assessment and audits, performance and network architecture support and remote hands.
