FLEXENTIAL®

Experience the power of IT flexibility

Powered by the

FlexAnywhere® Platform

Platform overview

A strategic and integrated approach to your technology infrastructure

A national data center footprint comprising of 40+ data centers, 18 markets, and a 100 Gbps network backbone

⦿ Standardized and built for scale

The agility and ability to scale in any direction with cloud, colocation, and connectivity options

⦿ Interoperable and complementary services

Improved performance, reliability, and agility with 3rd-party service and API integration
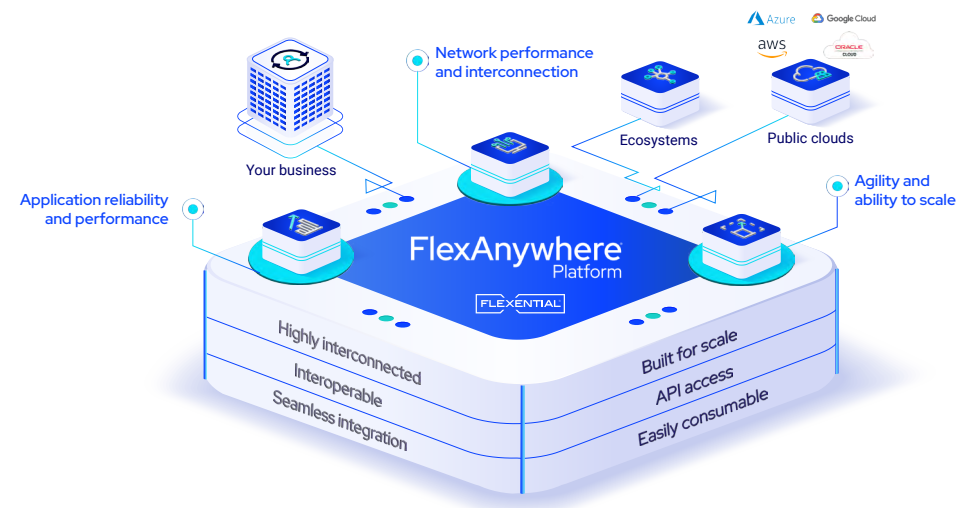

⦿ Pay as you go—and grow

Spend only on what you need with commercial flexibility and shift costs as business needs change

> "[Flexential] new data centers will build on the rapid growth that we've seen over the last year…helping us meet the explosive demand for high-performance cloud infrastructure to power AI workloads."
>
> **Brian Venturo**
> **CTO, CoreWeave**

Building blocks

A highly connected ecosystem powered to achieve your infrastructure goals

The FlexAnywhere Platform offers colocation, cloud services, interconnection, data protection, and professional services to support your hybrid IT journey.

Improve your IT environment and reinvest in strategic goals

48%
average customer ROI

50%
increased operational efficiency

90%
reduced downtime

—— Network backbone

Interconnection services

Your need for high-performance interconnection services and capabilities will be surpassed in our connectivity-rich facilities.

Cloud Fabric

Access to secure, low-latency connections to leading cloud service providers with software-defined interconnections that automate the connection process.

Learn More »

Flexential Marketplace

Discover, connect, and transact with an ecosystem of as-a-service providers, enterprises, and cloud platforms colocated across Flexential data centers.

Learn More »

Network Hub

Connect directly to public and private clouds and other regional network hubs and bring connectivity closer to your users for low latency requirements and stronger application performance.

Learn More »

IP Bandwidth

Fixed and burstable options up to 40 Gpbs, built on a foundation of redundant carriers that ensure a 100% uptime SLA and optional IP address advertising out of other centers.
Learn More »

Interconnection Mesh

Reduce complexity and add redundancy without the need for additional circuits on a superior and agile network that supports any-to-any connections.

Learn More »

Cross Connects

Leverage the physical cabling and management that provides critical access to carriers, clouds, and IT service providers with multiple connectivity types.

Learn More »

Data Center Interconnect

Connect between any two points on the Flexential data center network on the industry's highest level of connectivity by a single data center provider.
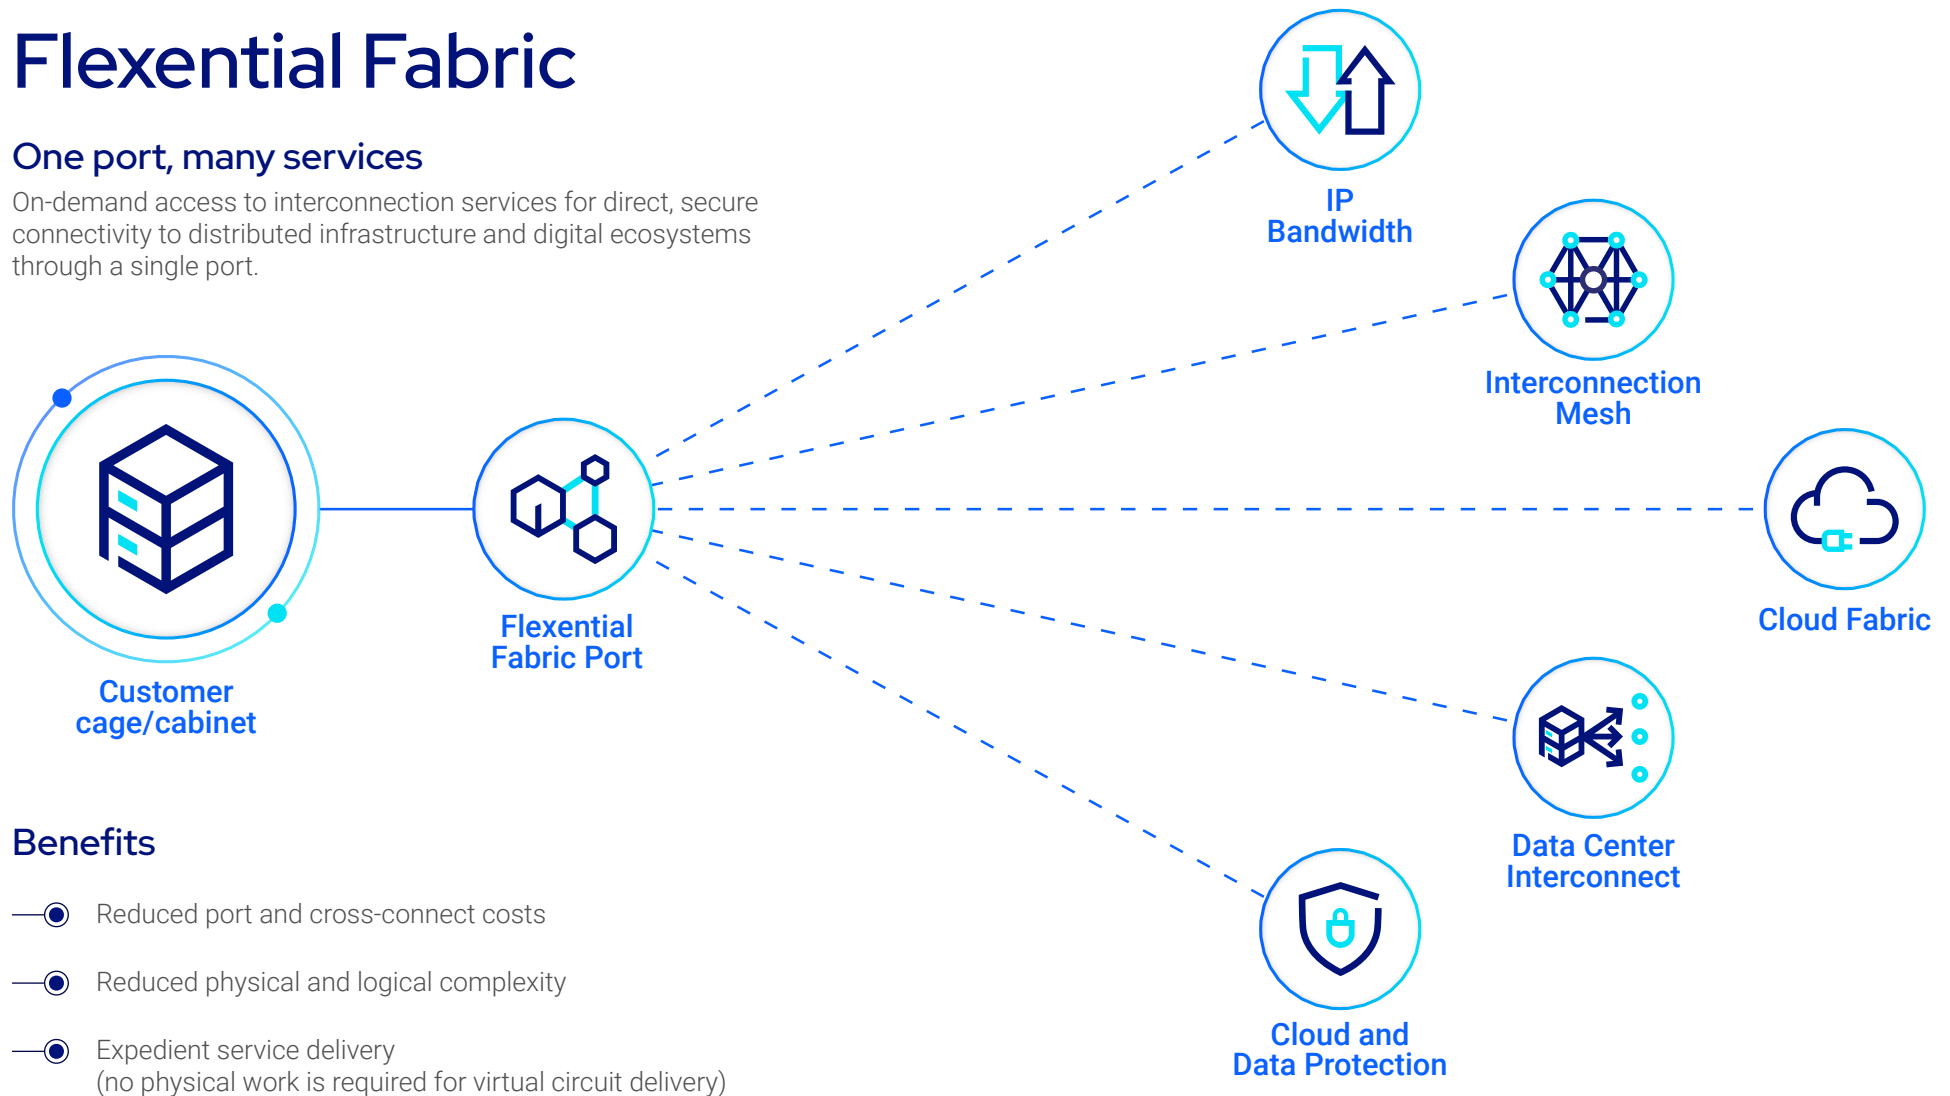

Learn More »

Flexential Fabric

One port, many services

On-demand access to interconnection services for direct, secure connectivity to distributed infrastructure and digital ecosystems through a single port.
